Project

Blog Website

Simple blogging website with backend made of MongoDB and EJS in
Backend and HTML and CSS for frontend.

SKASC college website

Our current college website is made by me and my 2 other friends in 2nd
year of my college. Made with HTML, CSS, Bootstrap, CodeIgniter.

ToDo List Website

ToDo list website using mongoDB for backend, HTML and CSS for frontend.

Simple Login Web Page

Login page for a Secret message posting website.

Sweet Shop Management App – C++

This was made in my High School days. This app can be used to print bills
on purchases made by customers and maintain the details of stock in
shops.
